***Drawings***

1. Figures 13-18 should be designated by a legend such as -- Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

2. Claims 1-10 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a deployable reflector including the specific structure of and cooperation between the deployable truss structure and the cable system as set forth in the combination of either claim 1 or claim 2.

Regarding the references to Gilger, it should be noted that the prior art device does not include the specific integrated cable system and is silent as to the claimed connections corresponding

to nodes and antinodes of the buckling mode in claim 1, or the specific relative stiffness ratios between the internal surface cable system and the circumferential surface cable system as found in claim 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### **Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references to Waters and Harless disclose various arrangements for deployable reflectors.
